

METHOD FOR SUBSCRIBER AVAILABILITY IN A RADIO COMMUNICATIONS SYSTEM

Abstract of the Disclosure

5 The invention pertains to a method for reaching subscribers in a radio
communication system in which an object identification is temporarily assigned to the
subscribers. The temporary object identifications are formed by subscriber data sets that
respectively define a complete subscriber environment of a virtual communication
network VP within the radio communication system, wherein one or more of such
10 subscriber data sets can be assigned to subscribers of the communication system.
